## PROFESSIONAL SUMMARY

Dedicated Information Technology Graduate with a strong foundation in computer hardware, software troubleshooting, and basic networking configuration, complemented by hands-on experience gained through IT support training and freelance technical work. Proficient in diagnosing system issues, maintaining hardware equipment, and building structured web and mobile applications with integrated backend systems. Eager to bring technical proficiency, adaptability, and a strong commitment to service excellence to IT and Technical Support roles.

## TECHNICAL SKILLS

- **IT Support & Infrastructure:** Hardware & Software Troubleshooting, System Maintenance, Printer Troubleshooting & Repair, Wi-Fi & Internet Connectivity, Basic Networking.
- **Programming & Development:** Python (Flask), C#, Dart (Flutter), PHP, Java, JavaScript (ES6+), HTML5, CSS3, MySQL, PostgreSQL, HeidiSQL.
- **API & Cloud Integration:** RESTful APIs, JSON, Firebase, Third-Party API Integration, Git/Version Control.
- **Frontend & Design:** UI/UX Design, Figma, Adobe XD.
- **Multimedia Tools:** Adobe Photoshop, Adobe Premiere Pro, Canva.
- **AI Tools :** Claude, Gemini, Cursor AI
- **Professional Competencies:** Independent Work, Team Collaboration, Problem-Solving, Adaptability, Time Management.

## PROFESSIONAL EXPERIENCE

**IT Support Intern (OJT) | First Laguna Electric Cooperative Inc. (FLECO)**
*National Highway, Brgy. Lewin, Lumban, Laguna | March 2026 – June 2026 (440 Hours Completed)*

- Provided comprehensive Technical Support for Computer Hardware and Software concerns across office operations.
- Performed routine maintenance, diagnostics, and troubleshooting for office printers and related hardware.
- Assisted staff members with system-related inquiries and operational software issues.
- Helped maintain optimal performance of office equipment and internal IT infrastructure.

**Freelance Technician | Lumban, Laguna**
*2023 – Present*

- Diagnosed and repaired desktop computers and laptops, addressing complex hardware component failures and software corruptions.
- Executed Windows OS installations, hardware driver configurations, and system performance optimizations.
- Resolved complex printer issues including ink blockages, printhead clogging, mechanical feeder issues, and waste ink counter errors.

## PROJECT EXPERIENCE

**TAPSYNC PH**
*Founder & Full-Stack Developer | On-going Development*

A customizable digital profile that lets you share all your details such as contact information, resume, portfolio, and social links with a single tap.

- **One-tap connection:** Quickly share your contact details, resume, portfolio, and social channels.
- **Customizable profile:** Personalize your profile layout and branding to fit your style or business.
- **Save contacts:** Download your details as a vCard for easy saving to a phone.
- **Web Application**: Architected and developed a full-stack digital profile web application enabling users to centralize and share contact details, resumes, portfolios, and social links via a single tap (NFC card).

**PIYUKONEK – Web-Based Platform for Student Concern Management and Supporting Mental Wellness (Capstone)**
*Full-Stack Developer | 2025 – 2026*

- Developed a centralized digital platform for managing student concerns and supporting mental wellness at LSPU Santa Cruz Main Campus.
- Automated grievance reporting workflows for students and faculty members.
- Architected and built the backend infrastructure using Python (Flask) and MySQL.

• Designed responsive user interfaces using HTML, CSS, and JavaScript with real-time status tracking and secure administrative dashboards.

**EVO: Integrated E-Commerce Platform**

*Full-Stack Developer | 2024 – 2025*

• Engineered a dual-platform e-commerce solution featuring a web storefront and a cross-platform mobile app.

• Implemented a unified backend utilizing Python (Flask) and MySQL to handle data processing and secure user authentication.

• Synchronized data seamlessly across Flutter-based mobile applications and web browser interfaces.

**Record Management System – Caliraya Water Refilling Station**

*Full-Stack Developer | 2022 – 2023*

• Designed and deployed a desktop-based record management system to digitize manual sales and inventory records for a local business.

• Developed the core application using C# with a fully integrated MySQL database.

• Improved operational workflows and data accuracy through automated transaction logging and inventory auditing.
